

FOR KNOWLEDGE PARTNERS AND ENTERPRISE TEAMS

Your academy. Your team's proof of competence.

Chronopoli, the Global Knowledge City for the digital economy,
hosted by Dubai Blockchain Center

- Digital assets
- AI
- Governance
- Risk & trust
- Financial-crime investigation
- Compliance
- Emerging tech

Founding Partner and pilot-cohort programme · Pre-launch · September 2026

Real grades and reports today; the team-admin console and evidence pack come with the pilot

DUBAI BLOCKCHAIN CENTER

The Global Knowledge City

AI, blockchain, governance, compliance, investigation, and enterprise risk — structured learning for professionals who shape the future.

Find Your District

LEARNING LAYERS

● DESIGN PROTOTYPE (NOT YET BUILT)

Backdrop: landing page

Built for two buyers

The organisations that shape the digital economy, and the teams that have to operate inside it

For Knowledge Partners

Protocols & stablecoin issuers · Analytics & investigation vendors
AI companies · Universities & think tanks · Banks

WHAT THEY WANT

- Educate your market
- Own the standard
- Build a talent pool
- Policy insight
- Revenue from content

UNIVERSITIES AND THINK TANKS ALSO WANT

- Co-certified executive education
- Research round tables with practitioners and regulators
- A route to industry for graduates

ONE CITY

● CHRON-AI

● CHRON-DA

● CHRON-GOV

● CHRON-COMP

● CHRON-INV

● CHRON-RISK

● CHRON-ET

For Enterprise Teams

Banks · Fintechs · VASPs & exchanges · Law enforcement
Regulators' & FIU teams · Corporates & treasury

WHAT THEY WANT

- Close competence gaps
- One training record
- Evidence for supervisors and audit
- Grow people into roles

ALSO FOR REGULATORS' AND FIU TEAMS

- CHRON-INV: tracing for FIUs and law enforcement
- CHRON-GOV: policy and supervision for regulators

Seven Knowledge Districts · four learning layers: L1 Entry · L2 Professional · L3 Institutional / Advanced Practitioner · L4 Influence / Live cohort

Partner roadmap (not signed): Founding: two seats open before launch · Strategic: Tether (target partner; the demo academy is an illustrative Tether scenario) · Content: specialist course providers by district · Institutional: BUiD (MOU in progress), universities, banks. **Tether is a target only; no partnership, endorsement or agreement is implied.**

The digital economy has a structural knowledge gap

No one connects digital assets, AI, governance, risk and investigation in one trusted, neutral place

Fragmentation

Slides 6-8, 13

Stablecoin infrastructure, AI governance, regulation, risk and forensics sit in silos: webinars, conference sessions and vendor decks, with no path by role and no single record.

We deliver: seven districts, partner tracks and role-based pathways (P1–P3, E1)

Speed mismatch

Slides 7, 12

MiCA changes, FATF updates, a new exploit creates a new typology. Universities take 18 months to update a curriculum, training firms 6; the market moves daily.

We deliver: your experts author courses directly; round tables become drafts within hours (P2, P8)

Fake credentials

Slides 8-9, 15

A certificate says someone sat in a room; it tells no employer or regulator what they know today, and 'who was trained?' is answered with a spreadsheet.

We deliver: badges on real grades (P3), grade reports (E3), badge-gated jobs (P4)

No neutral convener

Slides 4, 12

Nobody puts a protocol, a regulator, an investigator and a researcher in one room and turns the conversation into institutional knowledge.

We deliver: closed-door round tables with a Partner Intelligence Report (P8)

Three pillars, one platform

Every feature serves the network effect: more partners → more content → smarter AI → more value

Symposia

Community Intelligence Engine

- Live round tables, human-moderated, under the Chatham House Rule, streamed live
- Opinion papers drafted in 3 hours
- LinkedIn and Instagram content, one human approves (TikTok: roadmap)
- Partner Intelligence Reports per session

SHOWN IN THIS DECK

Slide 12

01

Company Academies

Branded partner academies

- Branded sub-academies at your own web address
- Custom learning pathways and a badge system
- Open Badges 2.0 credentials, co-issued with you
- **Talent pipeline:** badges matched to your open roles

SHOWN IN THIS DECK

Slides 6, 8-9, 11

02

Open Knowledge

AI Tutor + Digital Twins

- AI tutor grounded in platform content, citing its sources
- **Digital Twin:** an expert's documents become an AI avatar, with consent
- Open course marketplace, 70/30 revenue split
- Compounds with every new piece of content

SHOWN IN THIS DECK

Slides 10-11, 29

03

Shared platform core: courseware and course authoring, batch enrolment, gradebook and grade reports for enterprise teams (slides 7, 13-16)

What you get, and what is built today

Two tracks, one city · 5-question onboarding routes each learner to a home district and layer

FOR KNOWLEDGE PARTNERS

SCREEN LABELS ON THE PROOF SLIDES

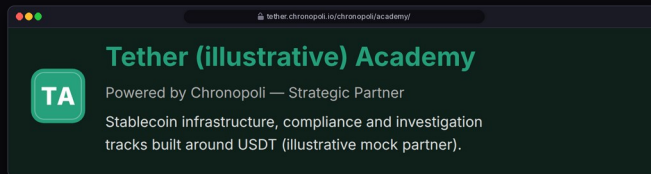

- REAL PLATFORM SCREEN
- DESIGN PROTOTYPE (NOT YET BUILT)

Your academy, under your name, inside the city

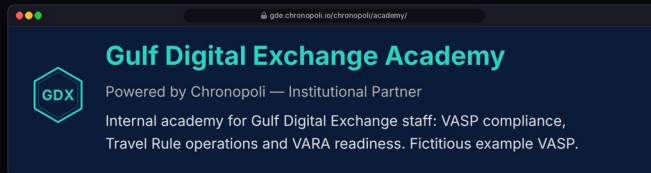

One template, three tenants: a stablecoin academy, a VASP's internal academy and a university school

AT LAUNCH

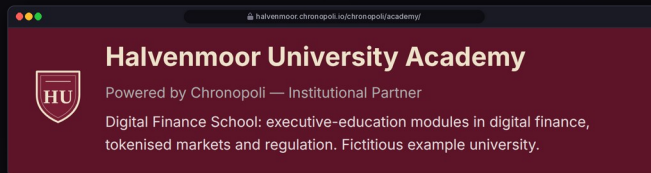

Your brand

tether.chronopoli.io (planned)

gde.chronopoli.io (planned)

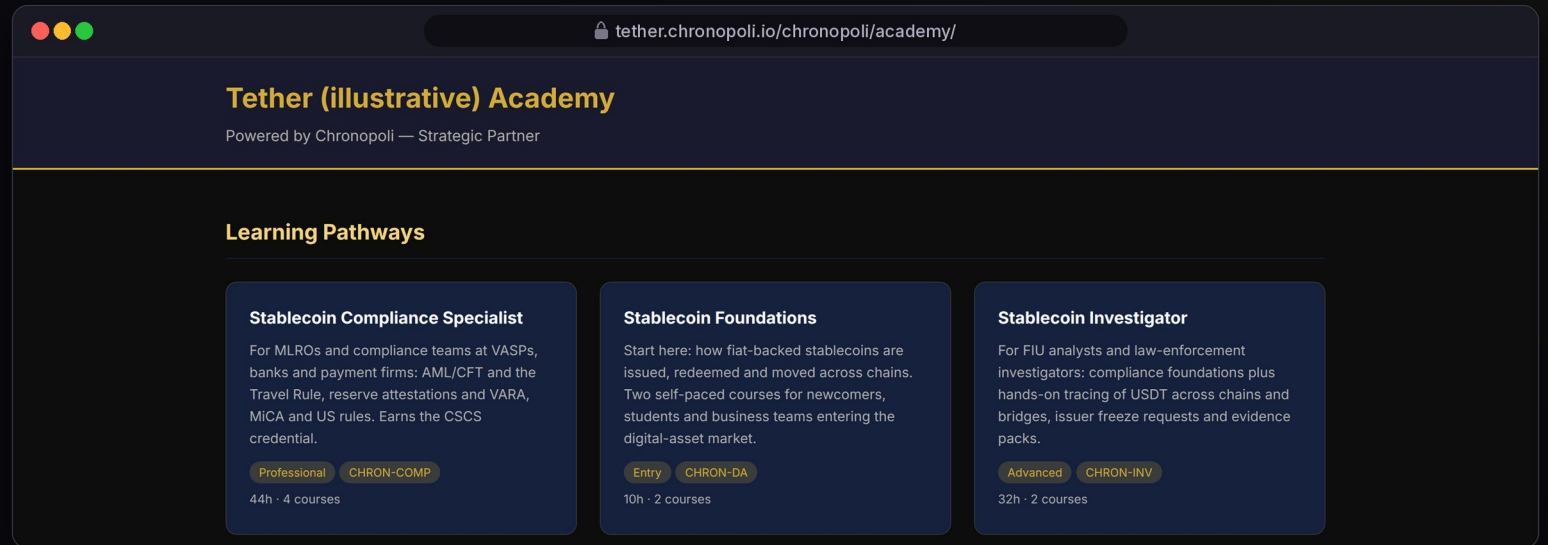

halvenmoor.chronopoli.io (planned)

● DESIGN PROTOTYPE (NOT YET BUILT)

Your colours, logo and tagline on the academy page · placeholder marks, not real logos

TODAY

One standard design in gold and navy

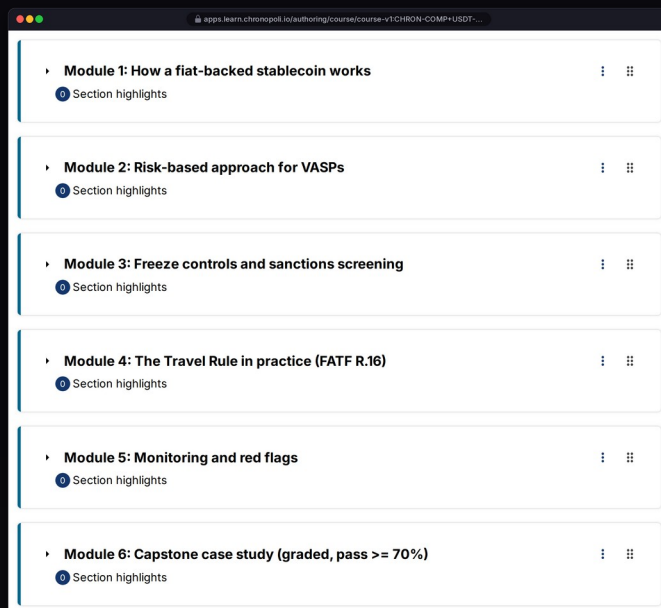

● REAL PLATFORM SCREEN

Today: the standard academy page, Tether (illustrative)

- **Today:** each academy shows its own partner's name, pathways and jobs
- **At launch:** your colours, logo and tagline, at your own address (<partner>.chronopoli.io); both are switched on before launch
- Staff-only academies, such as a VASP's internal school: access model set in the partner agreement

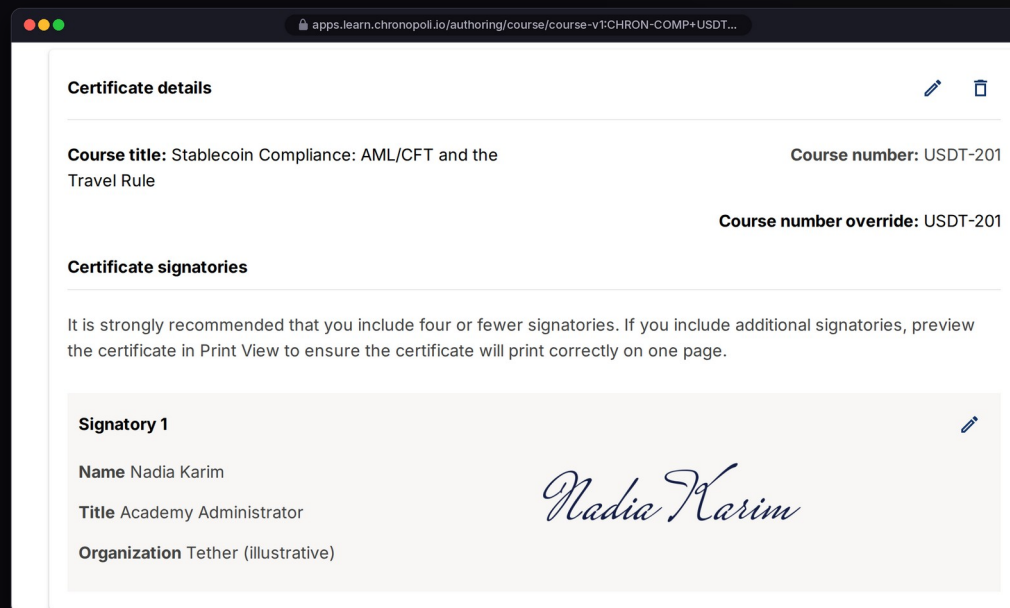

Bring your content: author and certify in a proven authoring tool

Your course team uses the authoring tool universities use: nothing proprietary to learn, nothing to rebuild

REAL PLATFORM SCREEN

Left: USDT-201 outline, six modules

REAL PLATFORM SCREEN

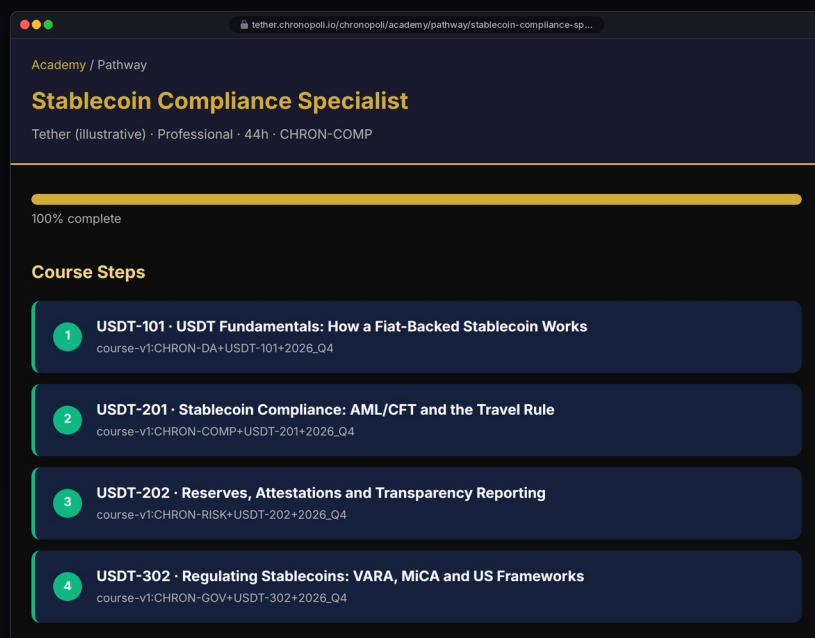

Right: certificate details; configured, not activated

- **Course authoring:** outline, rich-text units, schedule and grading (USDT-201: pass mark 70%; weighting: knowledge checks 40%, capstone 60%)
- **Certificate:** configured on the verified track with your signatory; activated at launch
- **Your content stays yours:** standard course export; rights, term and exit are set in the partner agreement

Browser address shows the planned domain · signatory Nadia Karim, Academy Administrator, Tether (illustrative) · mock course, fictitious signatory

Credentials that carry your name

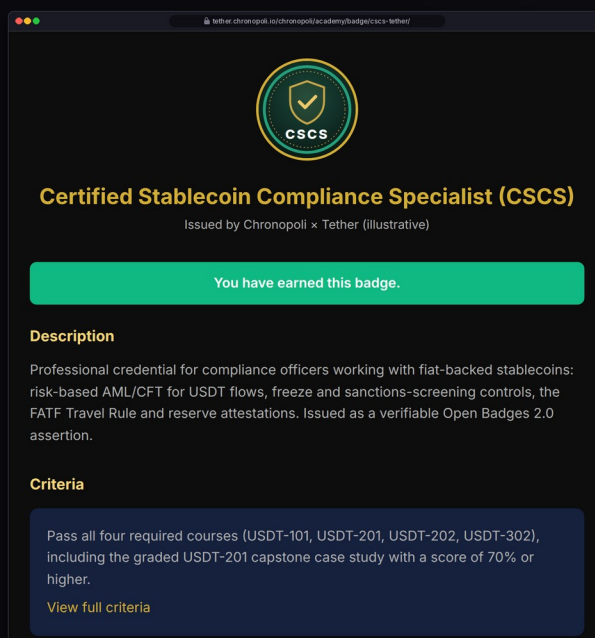

Pathways of ordered courses end in an Open Badges 2.0 badge co-issued by Chronopoli and your academy

REAL PLATFORM SCREEN

Left: CSCS pathway, 100% complete (sample progress data)

The on-screen 'verifiable' wording refers to public online verification, planned before launch · Tether (illustrative)

REAL PLATFORM SCREEN

Right: CSCS badge page as seen by the earner (fictitious learner)

- **Stablecoin Compliance Specialist:** 4 courses, 44 h, ending in the Certified Stablecoin Compliance Specialist (CSCS) badge
- **Criteria you set:** the courses, the 70% pass mark, the capstone; progress is read from the platform's grades, so a pathway is complete only when its courses are passed
- Open Badges 2.0 format, portable beyond Chronopoli; public online verification of each badge comes before launch

THREE PATHWAYS IN THE ILLUSTRATIVE ACADEMY

Stablecoin Foundations 2 courses · 10 h

Stablecoin Compliance Specialist 4 courses · 44 h

Stablecoin Investigator 2 courses · 32 h

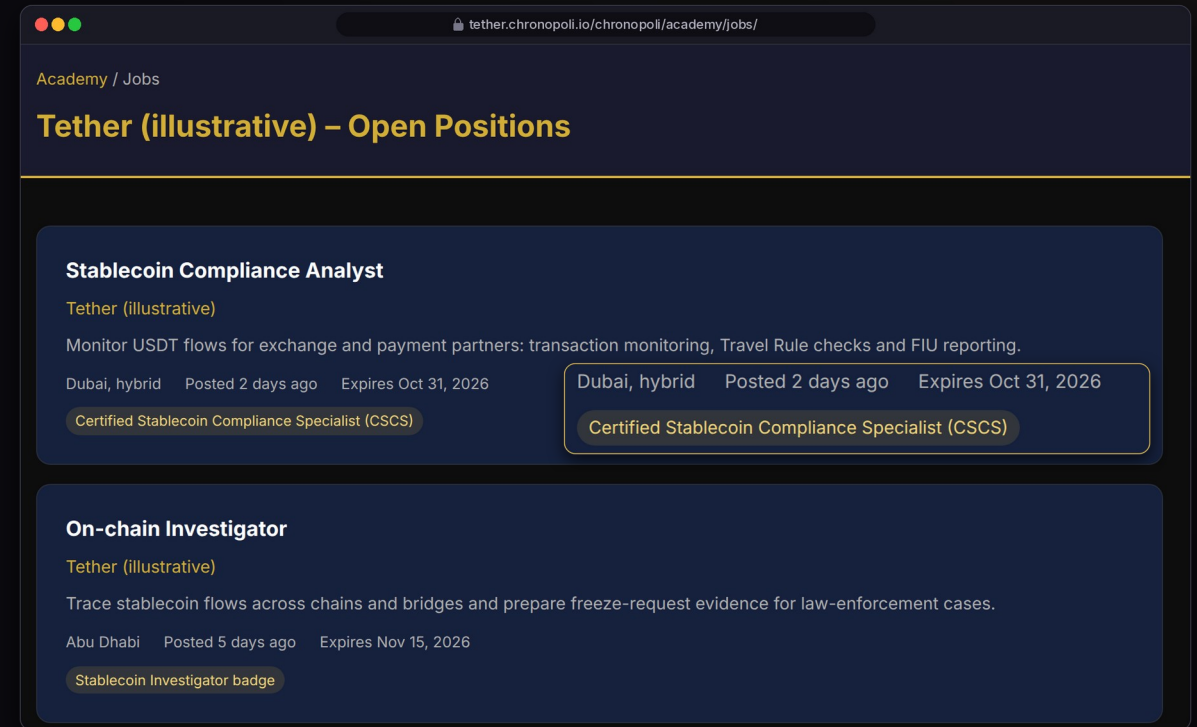

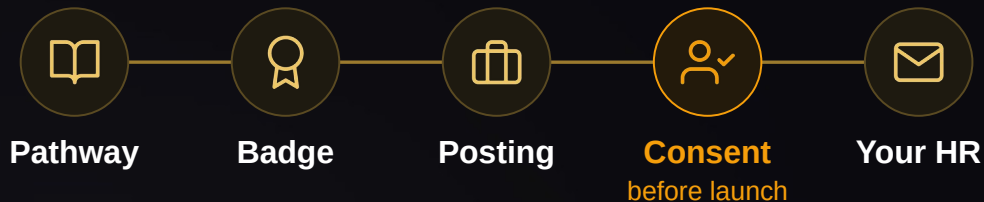

From pathway to hire: a talent pipeline you own

Job postings in your academy require your badge, so applicants arrive pre-qualified on your curriculum

- Each posting names the badge it requires (CSCS, Stablecoin Investigator, Stablecoin Foundations)
- **At launch:** when a learner applies and gives explicit consent, a credential snapshot goes to your HR notification address. No consent, no data
- Works for partners hiring into their ecosystem, universities placing graduates, and enterprises growing people internally

37 applications across the 4 postings, Q3 2026
(illustrative mock data)

THE PIPELINE, END TO END

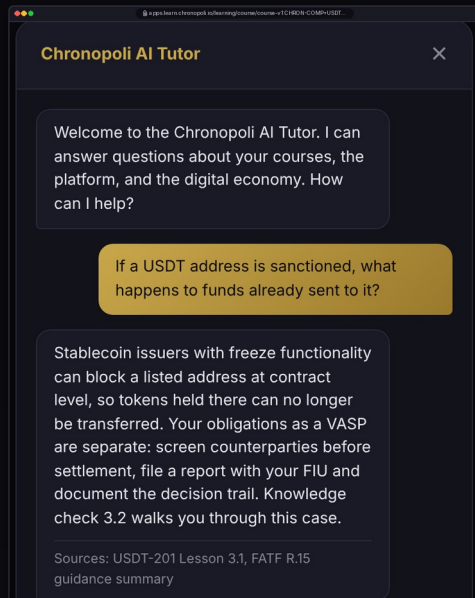

REAL PLATFORM SCREEN

Academy job board, first 2 of 4 postings; gold frame: zoom of the first badge chip · Tether (illustrative), mock roles · consent step: required before launch, not yet built

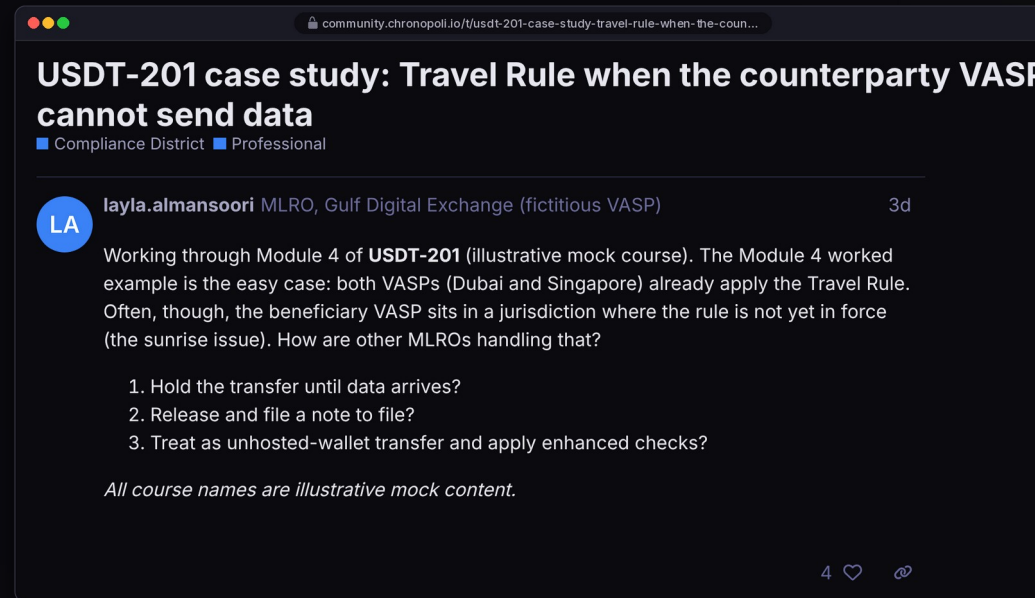

Learners stay engaged: an AI tutor on your content, and a community per district

Designed to answer from your course material and cite its sources; district forums connect practitioners, investigators and regulators

● DESIGN PROTOTYPE (NOT YET BUILT)

Left: the AI tutor on a mock lesson page; the answer is scripted demo copy

● REAL PLATFORM SCREEN

Right: the district forum in the Chronopoli design; a mock USDT-201 case-study thread, fictitious people

- **AI tutor:** answers from a knowledge base built from your courses; it shows its sources and is a learning aid, not advice
- **Before launch:** the knowledge base, its access rules and the handling of learner questions
- **Community:** one forum category per district, the same sign-in as the courses, course-linked threads
- **For partners:** questions and threads show what your market is struggling with

Your dashboard and your 70% split

OPERATING VIEW · ILLUSTRATIVE QUARTER

Tether (illustrative) demo data, Q3 2026, not real traction; the quarter's dollar figures are explained once, on slide 23

● DESIGN PROTOTYPE (NOT YET BUILT)

Partner dashboard, Payouts tab: the 70/30 split of the illustrative quarter · analytics, weekly e-mail and the 70/30 split are built; this page is not

- **Weekly e-mail report:** new enrolments, completions, badges, job applications and revenue. Analytics and the weekly report are built; the dashboard page comes before launch
- **70/30 split at checkout:** the split is built. Payout-account set-up, the payouts page, refunds and payout status come before launch. Tax treatment: set in the partner agreement
- Same dashboard for an institutional academy; KPIs shown are an illustrative stablecoin scenario

Five outputs in 3 hours, one human approves

Sponsor or co-convene a closed-door round table: opinion paper, LinkedIn posts, Instagram carousel, Partner Intelligence Report and an AI-tutor update

Live stream (designed)

Transcript

AI analysis

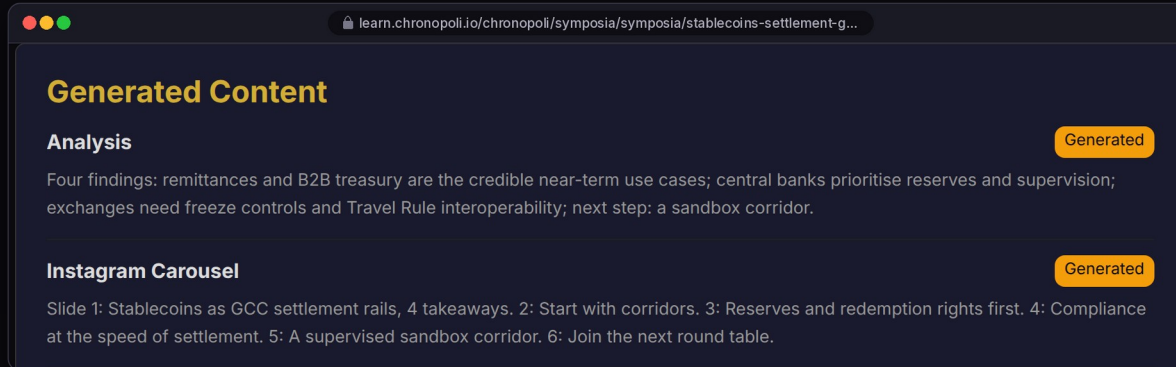

4 drafts

One human approves

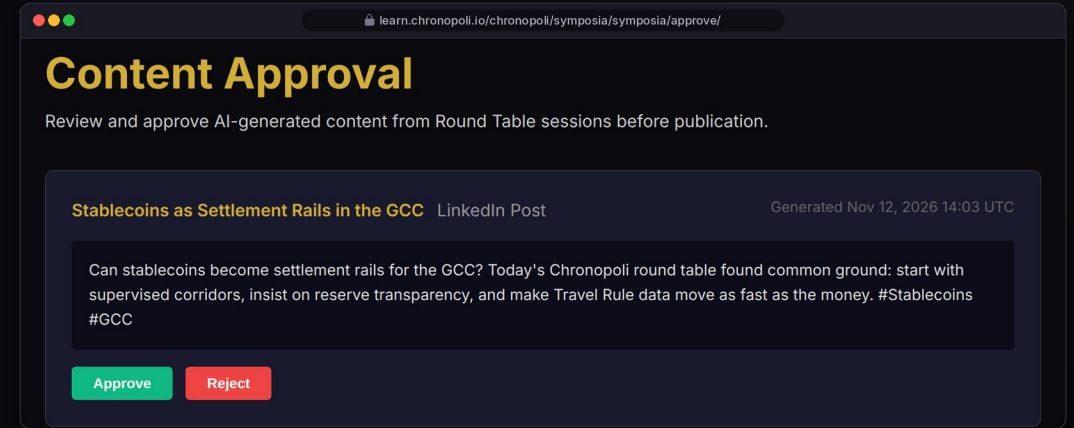

Publish + AI-tutor update

● REAL PLATFORM SCREEN

Left: 2 of 6 generated items, mock output texts · live streaming designed, not yet run

- Sponsor sign-off on sponsor-branded outputs, and for institutions the rights to transcripts, faculty publication and ethics review: set in the partner agreement
- The sponsoring partner receives the Partner Intelligence Report: themes relevant to you and suggested follow-ups for your tracks

● REAL PLATFORM SCREEN

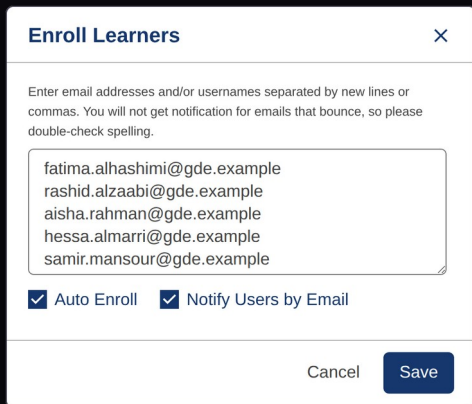

Right: staff approval queue, one card · session, people and sponsor illustrative

Attribution: named quotes can print today; removal is fixed before launch, and until then one human (Chronopoli staff) approves every output

Enrol a whole team in one paste, then group them as your company

Enterprise track, on the real platform: batch enrolment, then a company cohort for reporting

apps.learn.chronopoli.io/instructor-dashboard/course-v1:CHRON-COMP+U...

Cohorts ⚙️

Gulf Digital Exchange ▼ **+ Add Cohort**

✓ 18 learners have been added to this cohort. [Dismiss](#)

Gulf Digital Exchange (contains 18 students)
Learners are added to this cohort only when you provide their email addresses or usernames on this page. [What does this mean?](#)

● REAL PLATFORM SCREEN Right: Instructor Dashboard > Cohorts, cropped to the cohort panel

Browser addresses show the planned domain · seeded test cohort; grades from test learners answering in the browser, no overrides (slides 13-15) · entry box enlarged for display · Gulf Digital Exchange and its staff are fictitious

- Paste the e-mail addresses, tick Auto Enroll and Notify, save: 17 Gulf Digital Exchange employees enrolled in USDT-201; Layla, the MLRO, was already enrolled on her alias domain, making 18
- One manual cohort, 'Gulf Digital Exchange', holds all 18 seat holders, so every report can filter to your company; a CSV upload also assigns cohorts
- Standard enrolment uses the default track; our team moves your staff to the verified track in the pilot, automated in the team-admin console (E4)

See who is on track, and who needs help

Gradebook filtered to your cohort, and the staff view of any employee's progress against the 70% pass mark

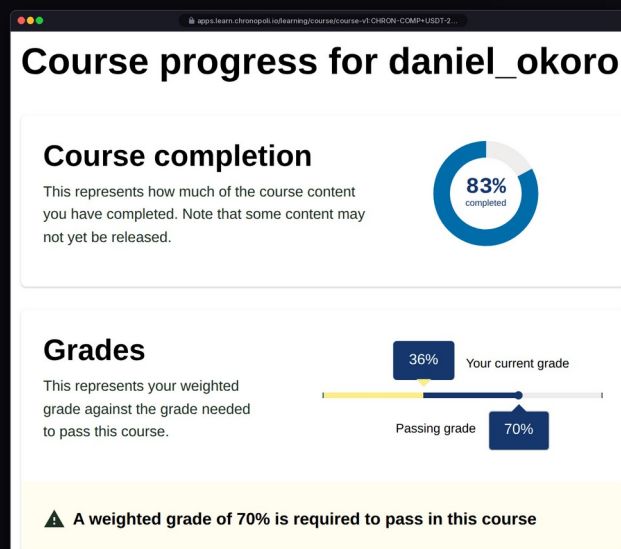

Showing 18 of 812 total learners

Username Student Key*	Full Name*	Email*	KC 01	KC 02	KC 03	KC 04	KC 05	CAP 01	Total Grade (%) i
ahmed_karam			100	50	100	100	50	100	92%
aisha_rahman			100	100	100	50	100	100	96%
arjun_mehta			100	50	100	0	0	0	20%

maryam_alshamsi			50	50	100	50	100	100	88%

REAL PLATFORM SCREEN

Left: gradebook, cohort 'Gulf Digital Exchange' (18 of 812 learners), first 10 of the 18 rows

- Your cohort, 18 learners, with every knowledge check, the capstone and the total: from 100% down to 0% (not started); 9 of 18 at or above the 70% pass mark
- Open one employee to see completion (83%) against grade (36%): capstone not yet attempted, so you know who to nudge

REAL PLATFORM SCREEN

Right: staff view of daniel_okoro

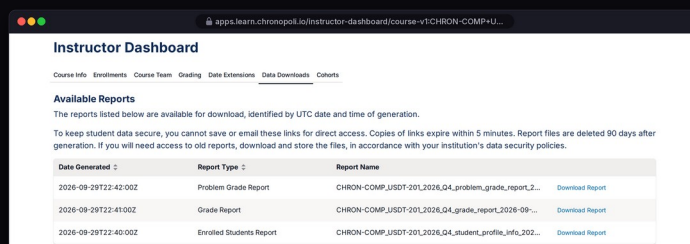

Who sees this: the gradebook is a course-staff view across all companies in the course. In the pilot only Chronopoli staff hold the course-staff role, and your team admin receives cohort-filtered views and reports; company-scoped admin access is part of the team-admin console (slide 16)

Demo system at a narrower browser width; addresses show the planned domain · scroll box expanded, tooltip colours restored (display only) · seeded cohort; grades from test learners, no overrides · fictitious people

Training evidence in a standard, system-generated format

The platform's standard Data Downloads produce a course-wide grade report; your cohort's rows (Cohort Name = Gulf Digital Exchange) are handed to you as a CSV

REAL PLATFORM SCREEN

Left: Instructor Dashboard > Data Downloads, reports generated on demand, timestamped in UTC

- **Per employee:** grade, knowledge checks, capstone, cohort, track, verification status, certificate eligibility
- **Verification status column:** 'ID Verified' is the platform's standard value, set manually by staff on the demo system; no ID check or proctoring performed

Before launch: report files sit in publicly reachable storage today; they are made private and access-controlled before launch, and pilot reports are delivered by the Chronopoli team, not by public link

CHRON-COMP_USDT-201_2026_Q4_grade_report_2026-09-29-2241.csv
Grade report exported from the platform's Instructor Dashboard (Data Downloads), 2026-09-29 22:41 UTC · USDT-201 · file: 829 data rows, 18 columns (A-R)

Real report, rendered as a table for readability. Rows with Cohort Name = Gulf Digital Exchange (18 of 829) and 10 of the 18 columns (A-D, J-O); not shown: per-check scores E-I and P-R (certificate delivery/type, enrolment status). Values are verbatim, in file order; Grade is a fraction (0.85 = 85%). Grey numbers are CSV line numbers. Fictitious learners and organisation.

Competitor ratings: Chronopoli master papers. Chronopoli column: built, not yet live; goes live with the launch plan; status per item on slide 5. The 48-hour update and online badge verification are launch targets.

Four self-reinforcing moats

Each moat strengthens the other three, and each one works in your favour as a partner or a team

Proprietary Knowledge Moat

Every round table, opinion paper and masterclass feeds the AI tutor. After 12 months no general-purpose AI has access to this knowledge base. It compounds like interest.

For you: Your learners get answers grounded in your district's sessions.

In this deck: slides 10, 12

Partner Lock-in Moat

When a partner builds its academy inside Chronopoli, its credential history, talent pipeline and community are embedded there and grow every year.

For you: Your academy gains value every year, and exit stays open.

In this deck: slides 6, 9, 22

Network Effects Moat

More partners → more round tables → more knowledge → more users → more employer demand → more partners: a two-sided flywheel in a high-value niche.

For you: Each new partner brings learners and employers to your district.

In this deck: slides 2, 4

Cost Structure Moat

About \$374 a month of infrastructure to start, and a lean cost base as the city grows. SaaS competitors cannot undercut this without operating at a loss.

For you: Your fee pays for the academy, not for overhead.

In this deck: slide 20

Companies pay. Students benefit.

B2B-first: Company Academy fees and team seats fund the city; learners get the credentials

REVENUE STREAM	WHAT IT COVERS	PRICE
Company Academies	Your branded academy: pathways, badges, jobs, dashboard	\$25K–\$150K / yr
Corporate Team Subscriptions	Seats for an enterprise team	\$1,500 / seat / yr
Individual Subscriptions	A single professional learner	\$490–\$1,490 / yr
Open Marketplace	Partner and creator course sales	70% creator · 30% Chronopoli
Certification	Each certificate issued	\$15 / certificate

Source: Chronopoli master papers (March 2026). Where your academy sits in the range, term and exclusivity: partner agreement; seats: pilot order.

TWO PRICING VIEWS

Commercial model (left): annual academy fees and subscriptions.

In the product (slides 11, 21, 23): per-course layer prices from \$0 to \$8,000 for single purchases, seats at \$125 a month (= \$1,500 a year), 70/30 split at checkout.

EXAMPLE: A FOUNDING ACADEMY, PER YEAR

\$150K

Your academy, trained staff and regulators, co-issued credentials, candidates for your hiring team and a Partner Intelligence Report per round table. One recruiter placement: about \$20K.

Packages: four partner tiers and a team licence

Every partner tier runs on the same platform capabilities. The tier describes your role in the city and what we ask of you

PACKAGE	WHO IT IS FOR	WHAT YOU GET	WHAT WE ASK OF YOU
 Founding Partner	First anchor partners who co-design the city	Academy + web address, flagship tracks, pathways + co-issued badges, badge-gated jobs, dashboard + weekly report, 70/30 payouts, first round tables, masterclass option	A Founding Academy fee (example: \$150K/yr), co-design time in the pilot cohort, a flagship track, the first round table in your district
 Strategic Partner	Protocols and issuers with multi-district curricula	Same capabilities, multi-district tracks, round-table sponsorship	An academy fee (\$25K–\$150K/yr), a multi-district curriculum
 Content Partner	Analytics, investigation, AI and specialist training firms	Partner tracks and pathways in the relevant district, dashboard, 70/30 payouts, round-table sponsorship	An academy fee (\$25K–\$150K/yr), tracks in one district
 Institutional Partner	Universities, think tanks, banks	Academy for students or staff, pathways + badges, course authoring, co-convened research round tables	An academy fee (\$25K–\$150K/yr), SMEs for one track, a research lead, a cohort
 Enterprise team licence	Banks, fintechs, VASPs, regulators, FIUs, corporates	Seats, batch enrolment, cohort, gradebook, grade reports, verified-track certificates; team-admin console and evidence pack with the pilot	Seats at \$1,500/seat/yr (\$125/month), a team admin, a seat list, a pathway choice

Team licence: \$1,500 per seat per year = \$125 per seat per month (list price in the master pricing and in the product) · billed on purchased seats, not assigned seats · example: 25 seats = \$3,125/month (\$37,500/year at list) · catalogue scope per seat, minimum term and pilot length set in the pilot order

- **Fixed in the product:** 70/30 split on partner-course sales; seat list price \$125/seat/month.
- Single-course price guidance by layer (partners set their own prices): L1 \$0-149 · L2 \$299-799 · L3 \$999-2,499 · L4 \$3,000-8,000.
- **Company Academy fee:** \$25K–\$150K/yr by scope (Founding Academy example: \$150K/yr, slide 20); tier placement in the range: partner agreement.

Who controls what: governance, IP and data access

Our proposed model. Each point is confirmed in the partner agreement or pilot order

Governance and IP

For partners and institutions

PROPOSED · CONFIRMED IN THE PARTNER AGREEMENT

-  **Contracting party:** named in the partner agreement
-  You control your course content, badge criteria and certificate signatory; Chronopoli controls the platform and the approval of AI-generated outputs
-  Content IP stays with the author; the licence to Chronopoli (scope, term) is set in the partner agreement
-  **Exit:** a standard course export plus the badge records issued under your academy
-  Research outputs from round tables follow the agreement's publication and attribution clause

Who sees your employees' data

For enterprise teams

PROPOSED · CONFIRMED IN THE PILOT ORDER

-  **Your team admin** Your cohort only (cohort-filtered reports in the pilot; company-scoped console in a later release)
-  **A partner academy** Course-level aggregates; learner-level data only with candidate consent (required before launch)
-  **Chronopoli staff** Operator access to all data; in the pilot they hold the course-staff role
-  Pilot environment, and the learner data allowed in it (for example pseudonymous usernames until data protection is hardened before launch), are set in the pilot order

Illustrative economics: per course, per quarter, per team licence

Fictitious Tether (illustrative) scenario showing the mechanics. Not a forecast, not traction.

PER 100 USDT-201

\$41,930

partner 70% of \$59,900

QUARTER GROSS

\$1,108,440

8 courses, Q3 2026

PARTNER 70%

\$775,908

of gross

TEAM LICENCE

\$3,125/mo

25 seats × \$125

Unit view: per 100 paid USDT-201 enrolments at \$599 → \$59,900 gross → \$41,930 partner (70%) · \$17,970 platform (30%)

Gross individual sales by course, Q3 2026 (USD, illustrative)

USDT-101 · L1	Free · 2,140 enrolments · the funnel	
USDT-102 · L1	\$40k	\$17k Chronopoli
USDT-201 · L2	\$218k	\$93k Chronopoli
USDT-202 · L2	\$73k	\$31k Chronopoli
USDT-203 · L2	\$59k	\$25k Chronopoli
USDT-301 · L3	\$147k	\$63k Chronopoli
USDT-302 · L3	\$82k	\$35k Chronopoli
USDT-401 · L4	\$158k	\$68k Chronopoli

■ Partner 70% ■ Chronopoli 30%

ILLUSTRATIVE MOCK DATA

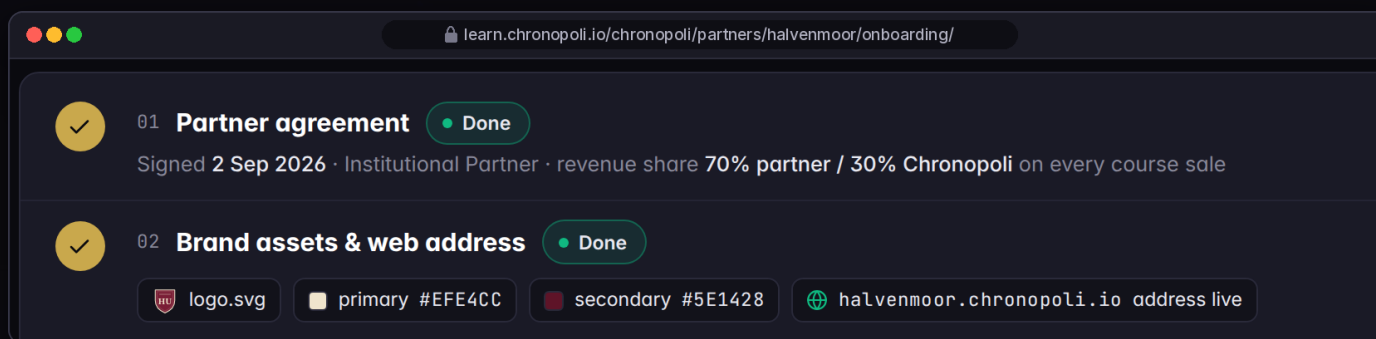

Fictitious Tether (USDT) academy, Gulf Digital Exchange licence · no partnership or traction implied · paid enrolments × list price

- **Illustrative quarter (Q3 2026):** 8 courses (USDT-101 to 401) · 4,812 enrolments · \$1,108,440 gross individual sales → \$775,908 partner (70%) · \$332,532 platform (30%)
- **Depth pays:** L3/L4 courses bring about 50% of gross from about 17% of paid enrolments; the free USDT-101 is the funnel (2,140 enrolments). Institutions may run L1 courses at \$0; the model then works on reach, not revenue
- **Team licence, Gulf Digital Exchange (fictitious):** 25 seats × \$125 = \$3,125/month (\$37,500/year at list); not included in the partner figures, sharing set in the partner agreement
- **Not modelled:** your expert time, content production and the annual Company Academy fee (\$25K–\$150K; slide 20)

How onboarding works: your first 90 days

Day 0 = the kick-off date set in your partner agreement or pilot order. Content work runs in a preview while the platform completes its launch preparation

	DAYS 0-30 · AGREE AND SET UP	DAYS 31-60 · BUILD	DAYS 61-90 · READY TO LAUNCH
Knowledge Partner	Agreement, tier and districts · brand assets and web address · payout account · HR notification e-mail · SMEs named	First track in course authoring · grading policy and certificate · pathway and badge criteria · content QA with the Chronopoli team · first round-table topic	Academy preview ready · job postings drafted · soft launch to your own audience
Enterprise team	Licence and seat list · roster and cohort · team admin named	Pathway choice · pilot cohort starts · first module completions tracked in the gradebook	First grade report reviewed with your team admin · environment and learner data: per pilot order

● DESIGN PROTOTYPE (NOT YET BUILT)

MOCK SCHEDULE · FICTITIOUS HALVENMOOR UNIVERSITY

Steps 01-02, not yet built · dates are a fictitious university's mock plan, not our commitment

Platform go-live: after launch preparation; no calendar date committed

- **Where learners come from:** your own channels first; in the city, the 5-question onboarding routes new learners to your district, plus community and round tables. No audience size is promised
- **Your effort:** an executive sponsor, one academy admin (or team admin), SMEs to author or review each module, one content-QA cycle per track; time agreed in the workshop

Trust by design

Commitments built into the product and the launch plan. These are design commitments, not certifications

Human approval

IN THE PRODUCT

One human approves or rejects every AI-generated round-table output before it is published

Chatham House

BY LAUNCH

Chatham House Rule sessions; removing attribution from outputs is fixed before launch

Expert consent

BY LAUNCH

No voice or avatar twin without the expert's written consent (required before launch)

Candidate consent

BY LAUNCH

No credential snapshot goes to partner HR without it (required before launch)

Open standards

IN THE PRODUCT

Open Badges 2.0 credentials; the platform's standard grade reports as CSV

Always current

IN THE PRODUCT

Platform improvements and security updates arrive with every release, at no extra cost

UAE hosting

BY LAUNCH

Target: hosting in the UAE, with strict least-privilege access set up before launch

Private reports

BY LAUNCH

Learner grade files move from publicly reachable storage to private storage before launch

Scoped AI tutor

BY LAUNCH

Answers cite sources, labelled a learning aid; per-partner scoping set up before launch

We hold no security certifications today. Our own security review logged 37 issues (6 critical, 18 high, 13 medium): 8 fixed, 3 partly fixed, 26 open, including 5 of the 6 critical items (one is the report storage above); 22 of the 26 are scheduled in the launch preparation. Summary available on request. Every outside service (hosting, payments, AI; voice and avatar media only for consented twins) is listed in the data-processing terms.

Questions buyers ask

Short answers; details in the partner agreement, the pilot order or on request

Is it live?

Not yet: built, launch plan in place; join now as Founding Partner or pilot

Will a regulator accept the evidence?

Grade reports and Open Badges records as evidence; no regulator recognition claimed

Support, SLA, term and exit?

Set in the pilot order / agreement; no SLA claimed; export + badge records on exit

What does it cost?

Academies \$25K–\$150K/yr; seats \$1,500/yr (\$125/month); 70/30 on course sales

Can the partner see our staff's grades?

Aggregates only; learner-level data needs consent (required before launch)

Academic credit? Language?

Granted by your institution, not the platform. English at launch; other languages on request

Who owns the content, and is it exclusive?

Standard, exportable course content; rights and exclusivity in the partner agreement

Learner data and contact?

Consent + partner access model before launch; set in the agreement

Research use of round tables?

Publication and attribution in the agreement; no automatic anonymity today

Can we use our brand?

Name, pathways, jobs today; colours, logo, web address before go-live

Where does data live?

Hosted in the UAE (target); data protection hardened before launch

Who else is in?

DBCC is the confirmed anchor; no partner signed (slide 19); Tether screens are illustrative

Two ways to start

Hosted by Dubai Blockchain Center: help build the place where the digital economy learns

FOR KNOWLEDGE PARTNERS

Founding Partner workshop

Half a day, terms on request: choose your districts, first track and pathway, badge criteria and first round-table topic, and leave with your 90-day plan. Institutions: the workshop also drafts the governance, IP and research terms for your committee

Districts + first track

Pathway + badge criteria

First round-table topic

Your 90-day plan

Institutions: governance, IP and research terms draft

FOR ENTERPRISE TEAMS

Pilot for 25 seats

Run one cohort on a pathway co-selected in the workshop from the courses available at pilot start, then review the first grade report together

25 seats at \$1,500/seat/yr list

Term and catalogue in the pilot order

Batch enrolment + cohort

Standard grade reports

Co-design the team-admin console

Next step: agree a workshop or pilot date, and name your sponsor and academy admin, or your team admin

Contact: partners@chronopoli.io · chronopoli.io/partners

Your account lead is named in the cover e-mail

Pre-launch · no go-live date committed · terms in the agreement or pilot order

Chronopoli is not a better Coursera. Not a smarter university.

It is a completely new architecture

where credentials are verifiable, content is AI-generated and regulation-linked, companies fund learning instead of students, and the degree is replaced by a dynamic professional record that follows you for life.

Scale your best expert with a digital-twin masterclass

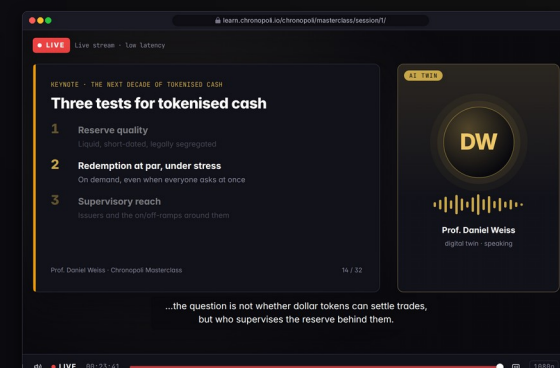

Your expert's publications become an interview-style masterclass, only with the expert's written consent

DESIGN PROTOTYPE (NOT YET BUILT)

Left: first 2 of 20 interview questions drafted for Prof. Daniel Weiss's twin, awaiting expert review

The expert is fictitious

DESIGN PROTOTYPE (NOT YET BUILT)

Right: live masterclass session design

- Publications are analysed by AI, which drafts interview questions at four levels: foundation, deep dive, confrontational, audience
- The expert reviews and approves the questions and suggested answers, and sets what's in and out of scope
- AI voice and avatar only with written consent; consent, review and withdrawal are required before launch and not yet built; live sessions are designed
